About the Book

This volume stands testimony to the renowned commitment of ETTLIS as emerging trends in Libraries and Information Services continues to dominate the discussions and conversations of library professionals throughout the world. The answer to the puzzles of modern librarianship is imbedded in the various papers presented at the ETTLIS2015 conference and crafted as chapters in this volume. The 66 papers, which adorn this collection, reflect the diaspora of research the Library community delve around the globe. This is the answer to the harsh labyrinth of conundrums a modern librarian face on a day today basis. It's worth noting that the papers harp on the research and deployment of latest technologies and techniques in furthering the cause of service delivery in libraries. They also supplement as answers to some of the questions arise due to information explosion. The case studies and overview papers carefully explore the underlying complexities of information dissemination and provide concrete answers to future service delivery of libraries and information centers. The simmering flames of technological ingenuities are also further fanned to dream for future libraries.

From time immemorial, Libraries have projected themselves as the beacon of human knowledge. The advent of Information and Communication Technologies has further strengthened this role with the effective use of these technologies in the realms of libraries. This collection of papers in this volume echoes these sentiments with a harmonious symphony. The six sections in this book radiate the essence of the emerging technologies in different dimensions and disseminate the results in a more authentic fashion. The umbilical cord, which binds the entire volume, is the concept of emerging technologies. Be it the implementation of the technology, or the user study or the emerging new technology there is answer to every aspect of the emerging technology. This volume with the collection of carefully crafted papers will no doubt stand as a testimony of the future of Information professionals with its rich documentation of the emerging technologies and practices in information science.

The continued commitment of ETTLIS to provide a platform for dialogue and discourse in the realms of emerging trends in the information superhighway is once again rewarded with this collection of research output. The belief that the existence of information scientists in this emerging new digital eco system needs constant dialogue and exchange of ideas is amplified through this volume. Survival in this digital environment depends mainly in networking and conversation and as a result there is a scope for interoperability and exchange. This magnum opus will aide in providing such platform in the form of network and collaboration through this volume and through the personal expertise shared by the information scientists at the 4th Emerging Trends and Technologies in Library and Information services.
