Chapter 1 Performance of Diverse Machine Learning Algorithms for Heart Disease Prognosis	1
<i>Dhruv Kaliraman, Gauri Kamath, Suchitra Khoje, and Prajakta Pardeshi</i>	
Chapter 2 Intelligent Ovarian Detection and Classification in Ultrasound Images Using Machine Learning Techniques.....	23
<i>V. Kiruthika, S. Sathiya, and M.M. Ramya</i>	
Chapter 3 On Effective Use of Feature Engineering for Improving the Predictive Capability of Machine Learning Models.....	53
Chapter 4 Artificial Intelligence Emergence in Disruptive Technology.....	63
<i>J. E. T. Akinsola and M. A. Adeagbo, K. A. Oladapo, S. A. Akinsehinde, and F. O. Onipede</i>	
Chapter 5 An Optimal Diabetic Features-Based Intelligent System to Predict Diabetic Retinal Disease.....	91
<i>M. Shanmuga Eswari and S. Balamurali</i>	
Chapter 6 Cross-Recurrence Quantification Analysis for Distinguishing Emotions Induced by Indian Classical Music	107
<i>M. Sushrutha Bharadwaj, V. G. Sangam, Shantala Hegde, and Anand Prem Rajan</i>	
Chapter 7 Pattern Recognition and Classification of Remotely Sensed Satellite Imagery	123
<i>Pramit Pandit, K. S. Kiran, and Bishvajit Bakshi</i>	

Chapter 8	Viability of Information and Correspondence Innovation for the Improvement of Communication Abilities in the Healthcare Industry	141
	<i>Pinki Paul and Balgopal Singh</i>	
Chapter 9	Application of 5G/6G Smart Systems to Overcome Pandemic and Disaster Situations	155
	<i>Jayanta Kumar Ray, Sanjib Sil, Rabindranath Bera, and Quazi Mohammad Alfred</i>	
Chapter 10	Risk Perception, Risk Management, and Safety Assessments: A Review of an Explosion in the Fireworks Industry	177
	<i>N. Indumathi, R. Ramalakshmi, N. Selvapalam, and V. Ajith</i>	
Chapter 11	High-Utility Itemset Mining: Fundamentals, Properties, Techniques and Research Scope	195
	<i>V. Jeevika Tharini and B.L. Shivakumar</i>	
Chapter 12	A Corpus Based Quantitative Analysis of Gurmukhi Script	211
	<i>Gurjot Singh Mahi and Amandeep Verma</i>	
Chapter 13	An Analysis of Protein Interaction and Its Methods, Metabolite Pathway and Drug Discovery	237
	<i>P. Lakshmi and D. Ramyachitra</i>	
Chapter 14	Biosensors for Disease Diagnosis	253
	<i>Ramneet Kaur, Dibita Mandal, Juveria Ansari, Prachi R. Londhe, Vedika Potdar, and Vishakkha Dash</i>

Preface

Computational intelligence is closely related to artificial intelligence where heuristic as well as metaheuristic algorithms are designed to provide better and optimized solutions in a reasonable amount of time. These algorithms have been effectively used in a variety of biomedical, bioinformatics, and biological science application domains in health informatics and computer science. The practice of recent biomedical research most times requires sophisticated technologies to manage patient information, plan diagnostics, prognostics, procedures, interpretations, and investigations. This provides a conceptual foundation as well as practical inspiration for computer science, decision science, information science, cognitive science, and biomedicine, which are all rapidly growing engineering and scientific areas.

Computational intelligence approaches are gaining attraction in the field of health informatics as a way to improve people's health. In this book, we focus on the applications of computational intelligence techniques in the domain of biomedical engineering and computer science. The applications of computational intelligence techniques in the domain of biomedical engineering is the subject of this book. In the healthcare sector, biomedical engineers develop algorithms that use artificial intelligence and corresponding hardware for decision modules for diagnosis and prognosis of diseases such as arrhythmia, cancer, and diabetes and other health-related issues in humans for early and more accurate detection and prevention. The use of intelligent strategies to undertake all of these actions could lead to more efficient outcomes.

Acknowledgments

We want to extend our gratitude to all the chapter authors for their sincere and timely support to make this book a grand success. We are equally thankful to all CRC executive board members for their kind approval granted to us as Editors of this book. We want to extend our sincere thanks to Dr. Gagandeep Singh, and Miss. Aditi Mittal from CRC for their valuable suggestions and encouragement throughout the project.

It is with immense pleasure that the Editors of this book express their thanks to our colleagues for their support, love, and motivation during this project. We are grateful to all the reviewers for their timely review and consent, which helped us improve the quality of the book.

We may have inadvertently left out many others, and we sincerely thank all of them for their support.

Ayodeji Olalekan Salau
Shruti Jain
Meenakshi Sood

Editors

Dr. Ayodeji Olalekan Salau received his B.Eng. in Electrical/Computer Engineering from the Federal University of Technology, Minna, Nigeria. He received his M.Sc. and Ph.D. degrees from the Obafemi Awolowo University, Ile-Ife, Nigeria. His research interests include computer vision, image processing, signal processing, machine learning, power systems engineering, and nuclear engineering. Dr. Salau serves as a reviewer for several reputable international journals. His research has been published in reputable international conferences, books, and major international journals. He is a registered Engineer with the Council for the Regulation of Engineering in Nigeria (COREN), a member of the International Association of Engineers (IAENG), and a recipient of the Quarterly Franklin Membership with ID number CR32878 given by the Editorial Board of London Journals Press in 2020 for top-quality research output. More recently, Dr. Salau's paper was awarded the best paper of the year 2019 in Cogent Engineering. In addition, he is the recipient of the International Research Award on New Science Inventions (N) under the category of "Best Researcher Award" given by ScienceFather in 2020. Currently, Dr. Salau works in the Department of Electrical/Electronics and Computer Engineering at Afe Babalola University.

Dr. Shruti Jain is an Associate Professor in the Department of Electronics and Communication Engineering at Jaypee University of Information Technology, Wanknaghat, HP, India, and received her Doctor of Science (D.Sc.) degree in Electronics and Communication Engineering. She has 16 years of teaching experience and has filed five patents, out of which one patent is granted and four are published. She has published more than 15 book chapters and 100 research papers in reputed indexed journals and international conferences. She has also published 11 books. She has completed two government-sponsored projects. She has guided six Ph.D. students and now has two registered students. She has also guided 11 M.Tech. scholars and more than 90 B.Tech. undergrads. Her research interests are in image and signal processing, soft computing, bio-inspired computing, and computer-aided design of FPGA and VLSI circuits. She is a senior member of IEEE, life member and Editor-in-Chief of the Biomedical Engineering Society of India, and a member of the International Association of Engineers. She is a member of the editorial board of many reputed journals. She is also a reviewer of many journals and a member of the technical program committees of different conferences. She was awarded a Nation Builder Award in 2018–2019.

Dr. Meenakshi Sood is currently an Associate Professor in CDC and Department of Electronics and Communication Engineering, National Institute of Technical Teachers' Training & Research (Ministry of Human Resource Development, Govt. of India), Chandigarh, India. She has teaching experience of around 20 years

and worked in various institutes of repute. She received her Ph.D. in Biomedical Signal Processing and is a Gold Medalist and has been awarded Academic Award for her performance in Master of Engineering (Hons.) from Panjab University, Chandigarh. She has guided four Ph.D. scholars, around 20 M.Tech. scholars, and more than 100 B.Tech. undergrads. Her research areas of interest are image and signal processing, bio-inspired computing, antenna design, metamaterials, soft computing techniques, and curriculum design and development. She has two government-sponsored projects currently running under her and has published more than 100 research papers in reputed indexed journals and international conferences. She has edited three books and authored study materials for ICDOEL, HP University. She is a senior member of IEEE and a life member of International Technical Societies and BMSEI. She is also an editor in reputed journals and a Member of the Expert Committee for Evaluation of Impact of DST-FIST Scheme. She was selected as a GSE member of Rotary International and visited the USA in Exchange Program.
